CoastalSigns

NEW: SOLAR POWER OPTION FOR LIGHTED SIGNS

OFF-GRID SIGN LIGHTING FROM COASTAL

SOLAR-POWERED SIGNS. LIT EVERY NIGHT. NO POWER NEEDED.

Put a lighted sign right where you need it, even with no power at the sign. We run 12-volt LED sign lighting (up to 100 watts) completely off-grid, with no trenching and no electric bill.

BUSINESSES · CHURCHES · SUBDIVISIONS · REMOTE SITES

No trenching, no power bill
No utility hookup and no monthly bill. The sun does the work.

On at dusk, off after 6 hours
Lights come on by themselves every night, all year long.

Built for our area
Works year-round in Alabama, Georgia and the Florida Panhandle.

Safe, long-life lithium
LiFePO4 (lithium iron phosphate), in lockable boxes in the sign base.

PICK YOUR PACKAGE

Every package runs the lights dusk plus 6 hours. More battery means more cloudy-day backup.

ESSENTIAL

A budget-friendly start for smaller signs.

1 night of backup for cloudy weather

- 400 W solar array
- 100 Ah lithium battery
- Smart MPPT controller with dusk timer
- Lockable battery box

Best for: smaller signs at open, sunny sites

$2,070 equipment package

MOST POPULAR

STANDARD

Our pick for most signs: double the battery.

3 nights of backup for cloudy weather

- 400 W solar array
- 200 Ah lithium battery
- Smart MPPT controller with dusk timer
- Lockable battery box

Best for: most business, church and subdivision signs

$2,680 equipment package

HEAVY-DUTY COMPLETE

Maximum backup, with everything included. Best for remote sites.

6 nights of backup for cloudy weather

- 400 W array, aluminum top-of-pole mount
- 400 Ah lithium bank (two 200 Ah)
- Smart controller, dusk-plus-6-hour timer
- Two lockable battery boxes
- Disconnect breakers and surge protection
- Battery monitor
- All wiring, bus bars and grounding

$6,530 equipment package

HOW IT WORKS

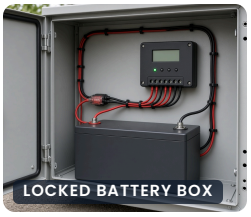
Sun — Daylight, even in winter

Solar Panel — Turns sunlight into power

Controller — Charges safely and runs the timer

Battery — Stores power for night and clouds

Sign Lights — LEDs glow dusk plus 6 hours



WHY COASTAL

- **Sized for winter sun.** We size every system for the short days of winter in our area.
- **Built to last.** Solar panels typically last 25 years.
- **One team, start to finish.** We build and install the sign and the power system together.
- **Backed up.** Manufacturers' warranties on the equipment. Ask us about Coastal's coverage.
